PROJECT MANAGEMENT

LOCALITY

CAF Project Management brings with it domestic and international experience delivering a variety of infrastructure projects ranging in value from AUD100K to AUD40M.

Team capability ranges from design management of large engineering projects through to superintendent duties for large corporations managing Tier 1 contractors deliver multi-million dollar infrastructure projects in highly sensitive operational areas such as airports, motorways and international inner-city environments.

CAF Project Management focuses on achieving exceptional value whilst delivering client requirements on budget, time and to satisfaction. Whilst all projects require this minimum level of service, CAF differentiate in providing clients with a seamless open delivery model. Key to this success is gaining complete understanding of client and stakeholder project objectives, drivers and constraints. CAF add value by bringing leadership, collaboration and open communication to the project and provide advice on options available, recommend a course of action and provide resources to follow through on recommendations.
